PROFESSIONAL PROFILE

- Fulbright scholar and engineer passionate about developing hardware and software solutions to improve people's lives.

EDUCATION

- **M.S. in Computer Engineering**
University of Southern California
August 2025 - Present
- **B.S. in Biomedical Engineering**
Tecnológico de Monterrey at Mexico City
August 2016 - December 2020
- **Biomedical Engineering Exchange Program**
University of North Texas
August - December 2019

AWARDS & RECOGNITIONS

- **Viterbi Endowment Scholarship (2025-2027)**
Full-tuition merit-based scholarship.
- **Fulbright Grant (2024)**
Grant to pursue graduate studies in the United States.
- **Graduated with Honors and Top of the Class (2020)**
Highest GPA in the B.S. in Biomedical Engineering.
- **Academic Distinction Scholarship (2016-2020)**
70% tuition merit-based scholarship.

STARTUP PROJECTS

- **Rivalry**
Launched an IOS/Android app using the Flutter framework to manage football flag leagues in Mexico.
March 2021 - June 2022
- **NurseCare MX**
Developed a digital platform to facilitate caregiver services between patients and nurses.
April - September 2021

SKILLS

- **Programming Languages**
C/C++, Python, Verilog, Assembly, Bash, VBA, Dart.
- **Software & Tools**
Modelsim, Cadence Virtuoso, Atmel Studio, Proteus, Git (Github), Ultimaker Cura, MATLAB, Arduino, Solidworks, LaTeX (Overleaf), Flutter.
- **Languages**
Spanish (native language), English (C1 level).
- **Soft Skills**
Teamwork, self-learning, creativity, problem solving, critical thinking.

WORK EXPERIENCE

- **Sr. Project Support Coordinator - PPD, Part of Thermo Fisher Scientific**

Led teams that deliver administrative support to pharmaceutical clinical trials, ensuring regulatory compliance and audit readiness.

Access Management Initiative

Co-led the development of an Excel tool using VBA macros to automate access reconciliation across systems, leading to substantial time savings and reducing regulatory risks in hundreds of clinical studies.

May 2021 - Aug 2025

ACADEMIC PUBLICATIONS

- **Fall Risk Assessment Research Article**
Fernandez, E., Montesinos, L., Gonzalez, A., & Pecchia, L. (2023). Recurrence quantification analysis of center of pressure trajectories for balance and fall-risk assessment in young and older adults. *IEEE Transactions on Neural Systems and Rehabilitation Engineering*, 31, 926–935. <https://doi.org/10.1109/tnsre.2023.3236454>

INDEPENDENT ENGINEERING PROJECTS

- **Home Server and Network Infrastructure Project**
Enhanced a residential wi-fi infrastructure and deployed a Debian-based server to host multiple services. These include a network-attached storage (NAS), a home automation hub, a local cloud solution, a reverse proxy, and a DNS filter/resolver.
December 2023-August 2024
- **3D Printer**
Assembled and modified a 3D printer, updating the motherboard and compiling new firmware to manage the modifications. A server was created using a Raspberry Pi to manage the printer through wi-fi.
December 2020
- **Brain-Computer Interface**
Developed a brain-computer interface for EEG signal classification using MATLAB.
November 2020
- **Vital Signs Monitor**
Assembled a vital signs monitor capable of recording electrocardiogram, pulse frequency, and temperature using Arduino.
November 2020
- **Hearing Aid Device**
Designed a customizable hearing aid device for people with hearing loss problems using Solidworks and MATLAB.
May 2020
- **Electric Wheelchair**
Designed and developed a human-machine interface using Arduino and Python to detect and classify eye movement signals to control an electric wheelchair for people with tetraplegia.
May 2020
